

## COVID-19 PRECAUTIONS

- ✓ The rooms and the indoor windows will be open during regular cleaning and will be ventilated at least for an hour.
- ✓ The staff responsible from cleaning will wear gloves after washing his/her hands and do the cleaning by gloves on. The gloves will be taken off after each room cleaning and the hands will be washed properly, the new gloves will be worn before the next room cleaning.
- ✓ The general cleaning will be made with water and detergent. Especially the places touched with hands frequently, door handles, mixer batteries, banisters, buttons, telephone handsets, television and air conditioner remote controls, rest rooms and the washbasins in communal areas will be cleaned much more carefully and regularly.
- ✓ The communal stuff such as glasses and plates will be washed with water and detergent after each use and will be stored in a hygienic place to the next use.
- ✓ The textiles used by the guest such as bedding, linens and the towels will be bundled by being folded, they will be gathered in such a way that the formation of dust and particles will be avoided during this process (the textiles should not be shaken off)
- ✓ The textiles such as linens and towels will be washed in the washing machine in 60-90 degrees with detergent.
- ✓ The chlorine levels of the pools will be kept according to the levels stated in the legislation.
- ✓ The regular maintenance and repair of the air conditioners found in the rooms will be performed according to the directions stated by the producer.
- ✓ The hotel staff will be trained about the precautions and especially providing hygiene.
- ✓ The hotel staff who has to touch personal stuff of the guests, carry the luggage will immediately wash their hands after this process or the hygiene of the hands will be provided by using alcohol-based hand disinfectant.
