

Hillside Beach Club Covid-19 Measures

Dear Valued Partner,

Some of the Covid-19 measures that are planned for the summer 2020 at Hillside Beach Club are as follows. We continuously follow up the news about the pandemic measures. These measures may change based on the progress of the pandemic.

Our primary advantage is the majority of the outdoor areas, due to the holiday village architecture. Continuous natural air circulation, large terraces and windows & doors opening to the open air are important assets. In addition, our air conditioning system does not let the air flow between rooms.

- Our opening date is set as 12th of June, as a result of the guidance of the Turkish Ministry of Tourism.
- Our maximum occupancy for the opening month is 60% and we will host only our domestic guests in June.
- All our guests will submit a Health Declaration Form if requested, before their departure from their city, and will be subject to a temperature/symptom control at the entrance of the property, together with our team members. Those guests with symptoms or having a temperature above the risky grade, will not be accepted to the property together with their companions and will be directed to the closest medical establishment.
- Our team will give service to the table in all our restaurants. We will arrange the seating plans, in order to increase the distance between tables.
- We apply HACCP management standards for food hygiene, and we are frequently audited.
- We use Diversey's "The Hygienic Room Program" for the cleaning and disinfection of all the rooms. The rooms will be fully hygienic and ventilated for a longer period of time.
- All activities and entertainment will be planned considering the social distancing. The distance between the sunbeds at the beach and the pool will be increased.
- We will act in line with the Covid-free certificate programme introduced by the Turkish Ministry of Tourism.
- There will be firmer health measures regarding Club services during the 2020 season. In addition, the Club reserves the right to modify or change its services and practices related to the services without prior notice. It is the guests' own decision to take a holiday at the Club, health related issues are under the responsibility of the guests themselves; Hillside Beach Club may not be held responsible.

Once these grey clouds clear away, we will be happy to make you feel good again on sunny Hillside days soon.

We wish you and your loved ones good health.

Best regards,
